

CIL MT (CBT-26) — Response Sheet Analysis

Nitish Kumar Singh · Participant ID 1421981400103 · Discipline: System

CBT held 24 Aug 2026, iON Digital Zone iDZ Baruipur, 3:00–6:00 PM

Scored against the green-tick key printed on the response sheet itself. Marking: 1 mark per correct answer, no negative marking.

Score summary

Section	Attempted	Correct	Wrong	Accuracy
Part 1 General Knowledge Awareness	25/25	17	8	68%
Part 2 Numerical Ability	25/25	16	9	64%
Part 3 Reasoning	25/25	18	7	72%
Part 4 General English	25/25	16	9	64%
Part 5 Domain Knowledge	100/100	52	48	52%
Paper I (Parts 1–4)	100/100	67	33	67%
Paper II (Part 5)	100/100	52	48	52%
TOTAL	200/200	119	81	60%

Provisional score: 119 / 200 (Paper I: 67/100, Paper II: 52/100). All 200 questions were attempted — nothing left blank, which is the right call with no negative marking.

Minimum qualifying marks per paper under Advt. No. 03/2026: 40 (UR/EWS), 35 (OBC-NCL), 30 (SC/ST/PwBD). Both papers clear the bar for every category.

Paper II — topic-wise breakdown

Topic	Correct	Total	Accuracy
COA & Digital Logic	6	17	35%
DBMS	3	8	38%
TOC & Compilers	8	21	38%
Maths / Probability	3	7	43%

Topic	Correct	Total	Accuracy
Programming (C / files)	1	2	50%
Networks	6	11	55%
Operating Systems	8	13	62%
Data Structures & Algorithms	15	19	79%
Other	2	2	100%

Possible objection

Paper II, Q59 — "What does a node in a singly linked list typically contain?"

Official key: **C. Data and two pointers**. You marked **D. Data and one pointer**.

A singly linked list node holds data plus a single `next` pointer; two pointers describes a *doubly* linked list. The key looks wrong here and this is worth challenging in the objection window.

One weaker candidate: **Q62** ("___ is NOT a valid token generated by a lexical analyzer", key A "Parser") — option C "Compiler" is equally not a token, so the item is ambiguous, but it is harder to win.

Question-by-question mistake log

Part 1 General Knowledge Awareness — 17/25

Q1 — During a National Emergency under Article 352, which Fundamental Right remains protected and cannot be suspended, as guaranteed by the 44th Amendment Act, 1978?

Your answer: **A**. Right to Freedom of Religion

Correct: **B**. Right to Life and Personal Liberty

Q2 — Which former Indian tennis player received the Padma Bhushan in 2026 in the field of Sports?

Your answer: **D**. Leander Paes

Correct: **A**. Vijay Amritraj

Q5 — The Revolt of 1857 broke out first at which military cantonment town?

Your answer: **B**. Jhansi

Correct: **D**. Meerut

Q13 — Which temple had been associated with the 41-day Mandala kaalam as its major pilgrimage season, followed by the Makaravilakku festival, and was surrounded by mountains and dense forests forming part of the Periyar Tiger Reserve?

Q16 — In which Union Budget had the Export Promotion Mission (EPM) been announced as a flagship structural reform aimed at strengthening India's trade competitiveness?

Your answer: **A.** Union Budget 2024-25

Correct: **D.** Union Budget 2025-26

Q21 — The PSLV-C62 / EOS-N1 Mission of ISRO, launched in January 2026, was conducted as the ninth dedicated commercial mission of which organisation?

Your answer: **A.** Indian National Space Promotion and Authorisation Centre

Correct: **C.** NewSpace India Limited

Q22 — Which ministry had released the SDG Bulletins titled "Planet in Focus: Advancing Environmental Sustainability under the SDGs" and "Delivering Prosperity at Scale: India's Economic Transformation through the SDGs" in March 2026?

Your answer: **C.** Ministry of Environment, Forest and Climate Change

Correct: **D.** Ministry of Statistics and Programme Implementation

Q25 — As per the Ministry of Ports, Shipping and Waterways, how many total Major Ports are there in India (As of June 2026)?

Your answer: **A.** 13

Correct: **D.** 14

Part 2 Numerical Ability — 16/25

Q12 — In a division sum, the divisor is 16 times the quotient and 5 times the remainder. If the remainder is 64, what is the dividend?

Your answer: **C.** 6469

Correct: **D.** 6464

Q16 — A sum, when invested at 20% simple interest per annum, amounts to ₹8,400 after 2 years. What is the simple interest (in ₹) on the same sum at the same rate in 2 years?

Your answer: **B.** 4,800

Correct: **A.** 2,400

Q17 — A train covers a certain distance at a uniform speed. If the train had been 6 km/hr faster, it would have taken 4 hours less than the scheduled time. If the train was slower by 6 km/hr, it would have taken 6 hours more than the scheduled time. What is the length of the journey?

Your answer: **A.** 680 km

Correct: **C.** 720 km

Your answer: **B.** 72 litres

Correct: **A.** 64 litres

Q21 — The geometric mean of four positive numbers is 12. Three of the numbers are 6, 18, and 24. What is the fourth number?

Your answer: **A.** 10

Correct: **B.** 8

Q22 — A solid metallic sphere of radius 6 cm is melted and recast into identical solid cones, each having a radius of 3 cm and a height of 12 cm. Assuming no loss of material, how many cones can be formed?

Your answer: **A.** 6

Correct: **C.** 8

Q23 — Three research assistants, A, B, and C, have efficiencies in the ratio 3 : 4 : 5. Together, they can complete a project in 12 days. If A works alone for the first 8 days, after which B and C join and all three continue working together, how many more days are required to complete the remaining work?

Your answer: **C.** 8

Correct: **D.** 10

Q24 — The amount A accumulated on an investment varies directly as the principal P and inversely as the square of the time t. When ₹20,000 is invested for 2 years, the accumulated amount is ₹25,000. If ₹45,000 is invested for 3 years under the same conditions, what will be the accumulated amount?

Your answer: **D.** ₹27,500

Correct: **B.** ₹25,000

Q25 — A researcher schedules three periodic tasks: Alpha every 22 days, Beta every 36 days, and Gamma every 45 days. All three tasks are completed together today. She wants to schedule the next review meeting on the earliest day when all three tasks are due again. After how many days should she hold the review meeting?

Your answer: **C.** 1,320

Correct: **A.** 1,980

Part 3 Reasoning — 18/25

Q3 — An accurate clock shows 2:00 PM. By how many degrees will the hour hand rotate when the clock shows 11:00 PM?

Your answer: **C.** 240°

Correct: **A.** 270°

Q5 — If 21 October 2003 is a Tuesday, then what will be the day of the week on 17 June 2011?

Q8 — What should come in place of the question mark (?) in the following series based on the English alphabetical order? LOJ MPK NQL ORM ?

Your answer: **D.** PSM

Correct: **B.** PSN

Q9 — Based on the English alphabetical order, three of the following four letter- clusters are alike in a certain way and thus form a group. Which letter-cluster DOES NOT belong to that group? (Note: The odd one out is not based on the number of consonants/vowels or their position in the letter-cluster.)

Your answer: **A.** AHD

Correct: **B.** LSP

Q20 — Six letters, P, Q, R, S, T and U, are written on different faces of a dice. Two positions of this dice are shown in the figure. Find the letter on the face opposite to T.

Your answer: **A.** U

Correct: **D.** P

Q21 — Seven boxes, C, H, A, I, R, E and D, are kept one over the other but not necessarily in the same order. Only H is kept above R. Only two boxes are kept between R and E. Only A is kept below I. D is not kept immediately above E. How many boxes are kept between C and A?

Your answer: **B.** One

Correct: **D.** Two

Q22 — Select the Venn diagram that best illustrates the relationship between the following classes Carrot, Fruit, Apple Ans

Your answer: **D.**

Correct: **B.**

Part 4 General English — 16/25

Q4 — Select the most appropriate option to fill in the blanks. If no article is required, select the option with 'No article required'. The symposium opened with ___ incisive critique of postcolonial theory and concluded with ___ ambitious rethinking of ecological ethics.

Your answer: **A.** No article required; No article required

Correct: **C.** an; an

Q8 — A sentence with a grammatical error is given here. Select the option that will rectify this error. Her research differed with the established theory on several key points.

Your answer: **A.** Her research differed to the established theory on several key points.

Correct: **C.** Her research differed from the established theory on several key points.

Q10 — From the fragments below, which order most coherently expresses a logical sequence?- (A) despite the preliminary evidence supporting the original framework (B) necessitating a series of methodological revisions (C) the experimental design was subsequently modified (D) when unforeseen variables began to influence the reliability of the findings

Your answer: **B.** A, C, B, D

Correct: **D.** A, C, D, B,

Q12 — Select the wrongly spelt word from the alternatives given below.

Your answer: **D.** Exoneration

Correct: **C.** Opponancy

Q15 — Select the one word that substitutes for the underlined words: Meera liked Krishna because she found him to be 'A person who is skilled in several arts.'

Your answer: **A.** Dilettante

Correct: **C.** Polymath

Q16 — Select the wrongly spelt word.

Your answer: **C.** Conscientious

Correct: **A.** Acquiescence

Q18 — Choose the correct one-word for the group of words given below.- a fear or dislike of foreign people, customs, or cultures

Your answer: **D.** Cynophobia

Correct: **A.** Xenophobia

Q20 — Choose the most appropriate option that has the same meaning as the given group of words: to steal a march on someone

Your answer: **D.** To secretly follow someone and copy their strategy without their knowledge

Correct: **B.** To gain advantage over someone by acting earlier or more quickly than they do

Q25 — What is the structure of the passage?

Your answer: **B.** Chronological-Descriptive

Correct: **C.** Definition-Explanation-Evaluation

Part 5 Domain Knowledge — 52/100

Q1 — What does the read() system call in an operating system do?

Your answer: **B.** Copies data directly from device hardware into user space without kernel intervention

Correct: **D.** Copies data from kernel space to user space, possibly after reading from device buffers

Q4 — Consider an FSM that accepts all strings over {a, b} with an even number of a's. Which regular expression corresponds to it?

Your answer: **A.** $(a+b)*a(a+b)*(b+c)$

Correct: **C.** $(b*(ab*ab*))^*$

Q5 — Identify the correct option for project operation in relational algebra: Statement-1: The project operation is a binary operation that returns its argument relation, with certain tuple left out. Statement-2: The result of the PROJECT operation can be visualized as a horizontal partition of the relation into two relations: one has the needed rows (tuples) and contains the result of the operation, and the other contains the discarded rows.

Your answer: **B.** Statement-1 is True and Statement-2 is True

Correct: **D.** Statement-1 is False and Statement-2 is False

Q15 — Consider a finite state transducer (FST) with $Q = \{q_0, q_1\}$, $\Sigma = \{0, 1\}$, $\Gamma = \{a, b, c\}$, initial state q_0 , and the following transitions: $\delta(q_0, 0) = q_1$, $\delta(q_0, 1) = q_0$, $\delta(q_1, 0) = q_0$, $\delta(q_1, 1) = q_1$ and output function: $\theta(q_0, 0) = a$, $\theta(q_0, 1) = c$, $\theta(q_1, 0) = b$, $\theta(q_1, 1) = a$. What will be the output string for the input 1010?

Your answer: **A.** caba

Correct: **C.** caab

Q17 — A system must recognize any number of consecutive 'a's. Which regular expression correctly models this?

Your answer: **A.** a^+

Correct: **D.** a^*

Q21 — Consider a Mealy machine designed to process a sequence representing the presence of mineral samples ('M') and non-mineral samples ('N') during a geological survey. The machine outputs 'A' when the current sample is 'M' and the previous sample was 'N', otherwise it outputs 'B'. Which description below correctly reflects the machine's output behavior?

Your answer: **C.** It changes output only when the input switches from 'M' to 'N'.

Correct: **D.** It produces output based on both the current input and the previous state.

Q22 — Which of the following is the correct symbol for representing the decimal number 12 in hexadecimal system?

Your answer: **C.** D

Correct: **B.** C

Q24 — Which of the following statements correctly differentiates connection-oriented from connectionless services?

Your answer: **A.** Connectionless has higher overhead; connection-oriented has minimal.

Correct: **B.** Connection-oriented ensures reliability and order; connectionless may not.

Q25 — What does each row in a relational table represent?

Your answer: **D.** Attribute

Correct: **A.** Tuple

Q26 — Which of the following traversals can be used to reconstruct a unique binary tree, if combined with Preorder?

Your answer: **A.** Postorder

Correct: **D.** Inorder

Q29 — Which parsing method uses a stack to store symbols and reduces them when a right-hand side pattern is recognized?

Your answer: **B.** Top-Down Parsing

Correct: **C.** Shift-Reduce Parsing

Q30 — What do you mean by TLD name servers?

Your answer: **B.** Tiered-level domain name servers

Correct: **A.** Top-level domain name servers

Q31 — In an associative memory system, the argument register is used to:

Your answer: **B.** Hold data to be written into memory

Correct: **D.** Compare with key fields in all memory locations simultaneously

Q33 — What is the best approach to delete an element from an unsorted array?

Your answer: **C.** Sort the array and then delete

Correct: **A.** Replace the element with the last element and reduce the array size

Q35 — In a shift-reduce parser, which of the following lists includes all four possible parser actions?

Your answer: **B.** Reduce, Copy, Accept, Abort

Correct: **D.** Shift, Reduce, Accept, Error

Q36 — Which of the following statements best reflects a comprehensive layered design issue in computer networks?

Your answer: **D.** The design issues of addressing and error control are handled exclusively by the network

Correct: **B.** Each layer must handle key issues like addressing, error control, flow control, sequencing

Q38 — In a circular queue implemented using an array, how is the rear counter updated after an enqueue operation?

Your answer: **A.** No update to rear pointer is needed in the enqueue operation

Correct: **C.** Incremented and wrapped around to the start if needed

Q39 — A 32-bit IEEE 754 single-precision floating-point number is represented as: 0100 0001 0100 1001 0000 0000 0000 0000 What is the decimal value of this floating-point number?

Your answer: **B.** 100.5

Correct: **C.** 12.5625

Q40 — Which of the following correctly describes an SQL schema?

Your answer: **D.** An SQL schema is a view that aggregates data from multiple tables.

Correct: **B.** An SQL schema is identified by a name, includes an authorization identifier for its owner,

Q43 — In an associative memory system, the key register holds:

Your answer: **A.** The memory address of the required data.

Correct: **B.** The tag field used for parallel comparison.

Q46 — Which of the following best describes the memory hierarchy in a computer system?

Your answer: **D.** Secondary Storage → Main Memory → Cache → Registers

Correct: **B.** Registers → Cache → Main Memory → Secondary Storage

Q48 — During a content search operation in associative memory, which register temporarily holds the key used to compare against all stored memory words simultaneously?

Your answer: **D.** Program Counter

Correct: **C.** Argument Register

Q49 — What is the division of the main memory in Fixed Partitioning in memory management of operating system?

Your answer: **D.** Created as needed by the processes.

Correct: **B.** Made at boot time and remain unchanged in size and number.

Q53 — Which of the following correctly represents the cofactor expansion of a 3x3 determinant along the first row?

Your answer: **C.** Sum of elements of the first column times their cofactors

Correct: **A.** Sum of each element of the first row times its corresponding cofactor

Q54 — If a measurement is recorded as 12.8 cm and the true value is 13.0 cm, what is the absolute error?

Your answer: **B.** 0 cm

Correct: **C.** 0.2 cm

Q56 — What shape is commonly used to represent an entity in an ER diagram?

Your answer: **C.** Ellipse

Correct: **D.** Rectangle

Q58 — Consider the following grammar $G: E \rightarrow T E' \quad E' \rightarrow + T E' \mid \epsilon \quad T \rightarrow F T' \quad T' \rightarrow * F T' \mid \epsilon \quad F \rightarrow (E) \mid id$ Which of the following statements about top-down parsing of grammar G is true?

Your answer: **C.** The grammar requires backtracking since FIRST and FOLLOW sets of E' overlap.

Correct: **A.** The grammar is suitable for LL(1) (predictive) parsing and does not require backtracking.

Your answer: **D.** Data and one pointer

Correct: **C.** Data and two pointers

Q60 — Which of the following is an application of compiler technology?

Your answer: **A.** Cache mapping

Correct: **C.** Code optimization

Q61 — Which statement best describes a zero-address instruction in stack-based architectures?

Your answer: **D.** Operands are fetched directly from main memory.

Correct: **A.** Operands are implicitly taken from the top of the stack.

Q62 — _____ is NOT a valid token typically generated by a lexical analyzer.

Your answer: **C.** Compiler

Correct: **A.** Parser

Q63 — Which of the following Windows API functions is used to write data to a file?

Your answer: **A.** fwrite()

Correct: **B.** WriteFile()

Q64 — Given two random variables X and Y with $E(X) = 2$, $E(Y) = 3$, and $E(XY) = 10$, what is the covariance of X and Y?

Your answer: **C.** 1

Correct: **D.** 4

Q66 — You are tasked to construct a binary search tree (BST) from a stream of incoming sensor readings, where each reading is processed as it arrives. Midway, the sensor malfunctions and emits a duplicate reading not originally in the stream. To preserve BST properties and ensure efficient future search operations, which strategy should you employ for the duplicate reading?

Your answer: **B.** Allow the duplicate in the left subtree and continue

Correct: **D.** Ignore the duplicate and continue inserting unique values

Q68 — The entity integrity constraint ensures that:

Your answer: **A.** All attribute values must belong to the same domain

Correct: **C.** No primary key value can be NULL

Q74 — Which statement correctly differentiates between SRAM and DRAM?

Your answer: **B.** DRAM is faster and more expensive than SRAM

Correct: **C.** SRAM is faster but more expensive than DRAM

Q75 — What is the output of a JK flip-flop when both inputs $J = 1$ and $K = 1$?

Q80 — Which of the following statements correctly describes the power set of the set $\{a, b\}$?

Your answer: **C**. It is the set containing only the singleton subsets of $\{a, b\}$

Correct: **B**. It is the set containing all possible subsets of $\{a, b\}$

Q82 — Which of the following statements correctly describes Isolation and Transaction Isolation Levels in a database system? Statement-1: Ensuring the isolation property is the responsibility of a component of the database system called the concurrency-control system. Statement-2: The isolation levels may be Serializable, Repeatable read, Read committed, Read uncommitted and all the isolation levels additionally disallow dirty writes, that is, they disallow writes to a data item that has already been written by another transaction that has not yet committed or aborted.

Your answer: **B**. Statement-1 is True and Statement-2 is False

Correct: **A**. Statement-1 is True and Statement-2 is True

Q83 — Which statement about left recursion in context-free grammars is accurate?

Your answer: **C**. Left recursion is required for building LL(1) parsers without any modification.

Correct: **D**. Left recursion can be direct or indirect and may lead to infinite recursion in top-down

Q85 — Which one of the following statements is true for a Hermitian matrix?

Your answer: **B**. All entries are real numbers

Correct: **D**. All diagonal elements are real numbers

Q87 — In the context of programming languages, if a compiler can determine the scope of a declaration by examining the program text alone, the language is said to use:

Your answer: **A**. Static policy and dynamic scope

Correct: **C**. Static policy and lexical scope

Q89 — Why is it considered good practice to close files explicitly even if the programming language runtime may close them at program termination?

Your answer: **A**. To guarantee file permissions are reset

Correct: **C**. To release resources promptly and avoid resource leaks during execution

Q93 — Which of the following best describes the interaction between CPU and DMA during block transfer?

Your answer: **C**. CPU transfers data to cache, DMA transfers it to I/O

Correct: **D**. CPU sends control information once, then DMA handles the transfer independently

Q94 — Which scenario is least suitable for sparse matrix representation in computer memory?

Your answer: **A**. A diagonal matrix

Correct: **D**. A matrix where most elements are nonzero

Q96 — A banking transaction commits successfully, but a system crash occurs immediately afterward. Which mechanism ensures durability?

Your answer: **C.** Transaction isolation

Correct: **A.** Redo log

Q98 — Which statement correctly defines the regular expressions? Statement-1: Regular expressions representation doesn't involve a combination of strings of symbols from some alphabet Σ , parentheses and the operators $+$, $\times$, and $*$. Statement-2: A regular expression is not obtained from the symbol $\{a, b, c\}$, empty string ϵ , and empty-set Φ perform the operations $+$, $\times$ and $*$ (union, concatenation and Kleene star).

Your answer: **A.** Statement-1 is False and Statement-2 is True

Correct: **C.** Statement-1 is False and Statement-2 is False

Q99 — The hardware organization of associative memory consists of:

Your answer: **B.** Argument Register(A), Memory Array Logic and Match Register(M) Only

Correct: **A.** Memory Array Logic, Argument Register(A), Key Register(K) and Match Register(M)
